TAYLOR AWOESLA KENNEDY

Software Developer & Automation Builder

Abuja, Nigeria | 09139112095 | tayken005@gmail.com | Portfolio | GitHub

PROFESSIONAL SUMMARY

Software Developer and Automation Builder with hands-on experience building, testing, debugging, deploying, and maintaining web applications, browser-automation systems, workflow tools, and AI-enabled automation. Experienced with JavaScript, TypeScript, Python, Next.js, React, Playwright, Supabase/PostgreSQL, APIs, Git/GitHub, and Vercel. Strong at translating operational problems into reliable technical workflows and improving repetitive processes through software and automation.

TECHNICAL SKILLS

Programming	JavaScript • TypeScript • Python • SQL • HTML • CSS
Frontend / Full Stack	Next.js • React • Node.js
Automation / Testing	Playwright • Browser Automation • Workflow Automation • QA Testing • Scheduling Systems
Backend / Data	Supabase • PostgreSQL • REST APIs • Database Integration
Development / Deployment	Git • GitHub • Vercel • VS Code • Terminal • macOS
AI / Development Tools	ChatGPT • Claude • Codex • Cursor • AI-Enabled Automation
Core Strengths	Debugging • Troubleshooting • Testing • Deployment • Documentation • Workflow Design • API Integration

SELECTED TECHNICAL PROJECTS

Trading Signal Monitoring System

Python • APIs • Automation • GitHub Actions • Testing

- Built a Python-based system to process market data, evaluate trading conditions, generate structured signals, and support automated monitoring and notification workflows.
- Integrated API/data workflows, secure configuration and environment-variable handling, error handling, and troubleshooting logic.
- Created automated tests and GitHub Actions validation; repository currently includes 13 passing tests and CI checks.

Workflow Automation Platform

Next.js • TypeScript • Playwright • Supabase/PostgreSQL • APIs • Vercel

- Contributed to a full-stack platform coordinating scheduled browser tasks, account workflows, job execution, and operational processes through a dashboard and automated workers.
- Worked across database-backed jobs, scheduling, browser automation, API integration, debugging, QA, Git/GitHub source control, and Vercel deployment.

Browser Automation & Scheduling System

Python • Playwright • Browser Profiles • Scheduling • Automation

- Developed and maintained recurring browser workflows with scheduling, rotation/account-selection logic, duplicate prevention, activity logging, error handling, and QA testing.

TECHNICAL & OPERATIONS EXPERIENCE

Account Manager | Technical & Automation Operations

Onyxpire | Remote | 2025 - 2026

- Progressed from customer-facing operations into account management and technical/automation responsibilities.
- Contributed to development, testing, debugging, and improvement of internal workflow-automation systems; investigated failed executions and supported scheduling, account-selection, and automated task processing.
- Troubleshot browser profiles, automated processes, and web applications; performed QA before workflow changes were used operationally.
- Worked with JavaScript, TypeScript, Next.js, Playwright, Supabase, APIs, GitHub, Vercel, and browser-automation tools.
- Coordinated day-to-day workflows, supported onboarding/training, maintained operational documentation, and communicated requirements between operational and technical team members.

Chat Manager / Team Supervisor

Icon Agency | Remote | 2023 - 2025

- Supervised and coordinated team members across multiple accounts; trained and coached staff on procedures, communication standards, and performance expectations.
- Reviewed work quality, coordinated schedules and coverage, resolved operational problems, and maintained performance documentation for management.

Customer Engagement Specialist

Yvy Agency & Icon Agency | Remote | 2022 - 2024

- Managed high volumes of written customer communication, maintained accurate records, handled multiple simultaneous conversations, and escalated unusual cases when necessary.
- Developed strong written communication, customer-service, problem-solving, relationship-management, and attention-to-detail skills.

PROFESSIONAL HIGHLIGHTS

Career progression: customer engagement → team supervision → account management → technical automation.
Leadership: mentored/coached approximately 15 team members and coordinated teams of roughly 5–12 people.
Technical scope: frontend, backend, database, browser automation, deployment, debugging, testing, and remote collaboration.

EDUCATION & CREDENTIALS

B.Sc. Rehabilitation Science (Special Education) — University of Jos, 2020
Product Management Certification — Enevolab, 2025
National Youth Service Corps (NYSC) — Abuja, FCT, completed 2022

ADDITIONAL STRENGTHS

Technical Problem Solving • Written Communication • Research • Documentation • Attention to Detail • Analytical Thinking • Independent Remote Work • Team Collaboration • Leadership • Continuous Learning
